

Tyre maintenance warning

Young drivers are putting themselves at risk through lack of awareness and knowledge of tyre maintenance

A new study has highlighted that young drivers are at a greater risk of being involved in a motoring accident due to poorly maintained tyres. Over a third of drivers aged 18-25 had never checked their tyres and two out of three hadn't checked within the last month.

It is recommended that you check your tread depth and general tyre wear every month

85% of the young drivers asked were unaware that the maximum fine on just one illegal tyre was £2500 and could also carry penalty points, highlighting the need to educate and inform a large number of drivers.

vGroup can offer a selection of tyre monitoring tools that are clear and simple to use and could save a possible hefty fine and even points on their license.

Call us to find out more about these or any of our other motoring safety products and kits.
