

Keep your tyres safe!

Safe tyres save lives, ensure your fleet is safe now.

Fleet drivers are being reminded of the need for regular tyre checks by one of the UK's leading tyre safety organisations, Tyresafe.

This example, highlighted by an independent tyre dealer, shows a tyre that was so badly worn that none of the tread pattern remained, rendering the tyre to be extremely hazardous, especially in poor weather and at high speeds.

It is recommended that tyre tread depth and general wear is checked at least once a month

Current UK law requires tyres to have at least 1.6mm of tread across the central three-quarters, around its entire circumference.

Those found in breach of the laws can be fined of up to £2,500 and three penalty points per tyre.

vGroup can offer a selection of tyre monitoring tools that are quick, clear and simple to use.

Call us to find out more about these or any of our other motoring safety products and kits.
