FAQ

PLATFORMS

vGroup offer more than just physical products, there is also a range of websites, apps and online solutions available to support customers and also the vehicle end user. Our platforms function to reduce either labour, plastic and paper usage, or to increase customer engagement, communication and brand awareness.

A number of these solutions are available to OBL, please ask our team for more information.

LINKING THE INDUSTRY TOGETHER

vLink

- New online ordering platform
- Enhanced customer journey through improved user experience
- One log in, one check out, one platform
- User friendly platform with images and descriptions

vLink is our new online ordering platform to link all of our brands together. vLink is a major differentiator within our sector and further sets us apart from current and future competitors. It delivers an improved customer journey and improvements in the automation of orders will reduce the cost of trading with vGroup International.

vLink will improve customer satisfaction with the improvements it brings to the customer journey. To reduce customer admin time we have reduced the amount of clicks from start of order to checkout. Users now only have to log in and out of different platforms, they can

now order everything within one log in and under one checkout. Product images are now a key highlight of vLink as customers can now see what products they are ordering and what the packs include. Overall, vLink is one step closer to becoming an E-Commerce website, it is more user friendly and has become more familiar to use to our customers.

In the next feature, vLink will be our own online catalogue open to any customer and any route to market as a full scale eCommerce platform with category management tabs.

MATS FOR YOU, BY YOU.

MATAPP by vLink

- Ultimate solution for bespoke floor and boot mats
- Perfectly suited to both dealer and retail environments
- Exceptional handover experience without holding stocks
- Cross-platform compatible application
- Distributor and retailer dashboard to manage products and orders

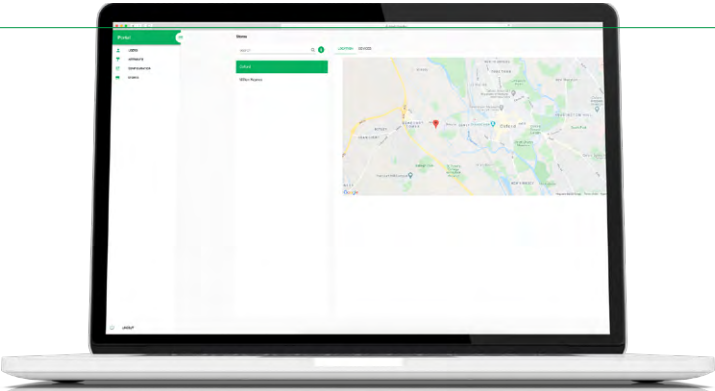

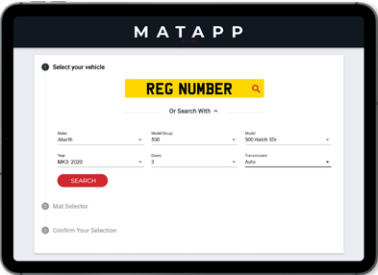

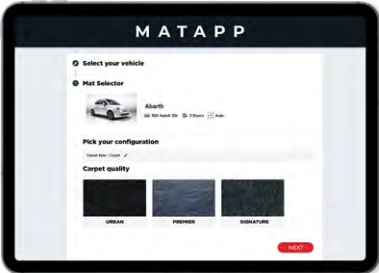

'MATAPP by vLink' has been developed to offer a revolutionary way to purchase bespoke, tailored car mats through retailers and dealerships. The platform helps stores and branches reduce stock levels, whilst providing an exceptional customer experience for end users.

'MyMat' gives access to store insights, where retailers and dealers can see which locations are best performing. Setting up products and configurations centrally and managing the platform from one location is an invaluable tool for network wide rollout. The application has been

designed with digital 'KIOSK' terminals in mind, but also works seamlessly across computers, tablet and mobile phones.

The platform will strengthen vGroup's relationship with retailers and dealerships, whilst showcasing manufacturing capabilities and implementing JIT deliveries without own, dedicated fleet. Multiple income streams are key for business growth and sustainability, therefore the next phase will offer products from our travel and breakdown range.

To find out more information, contact sales@vgroupinternational.com.

THE ULTIMATE QR CODE SOLUTION.

QRS by vLink

- Easy one stop shop for all driver needs
- Supporting the 4th industrial revolution, Connectivity
- Dynamic updates, giving the driver the most up to date data
- Reduce plastic and paper without impacting the driver experience
- Improved environmental impact

'vScan', the QR Code platform delivers a dynamic way for leasing companies to communicate with end users. It enables users to top up their safety kits, access in-life services and find contact information.

The digital solution can be updated at any time, information to driver is always relevant. The platform offers an opportunity to upsell to more safety items, providing additional rebate opportunity for customers. 'vScan' aims to reduce overall stock risks, updating details online

to eradicate obsolescence. Finally, thanks to 'vScan', the number of items in packs can be reduced through consolidation, money and material saving resulting in improved environmental impact and better driver experience. Smarter products deliver better pricing and stronger customer experience.

For vGroup, the platform will reduce paper and plastic usage through consolidating marketing assets in packs and reduce labour on requesting stock replenishments.

ONE STOP SHOP FOR ALL COMMERCIAL VEHICLE SERVICES.

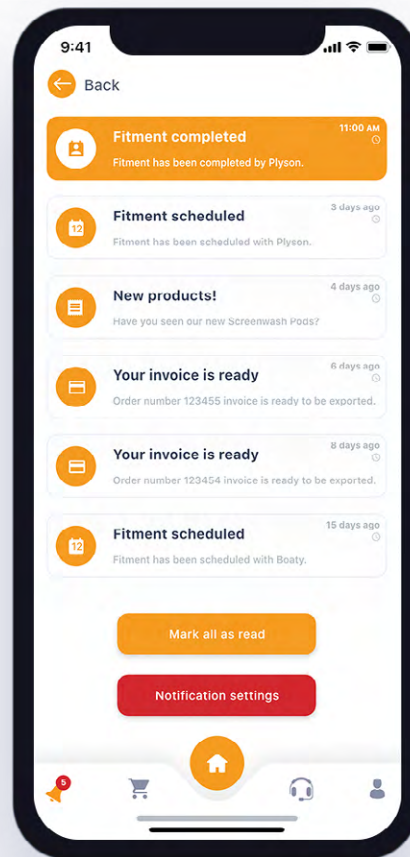

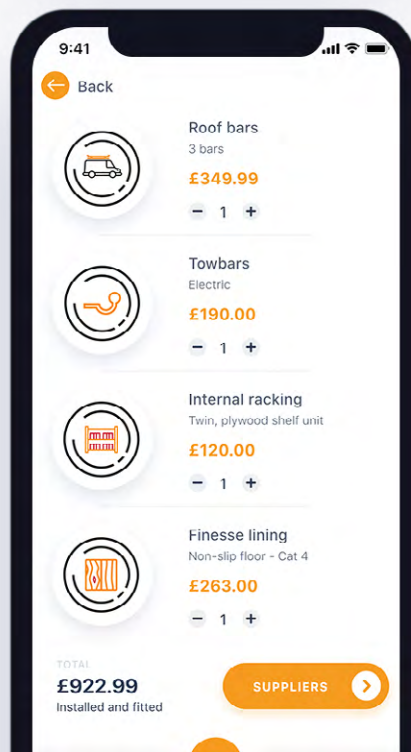

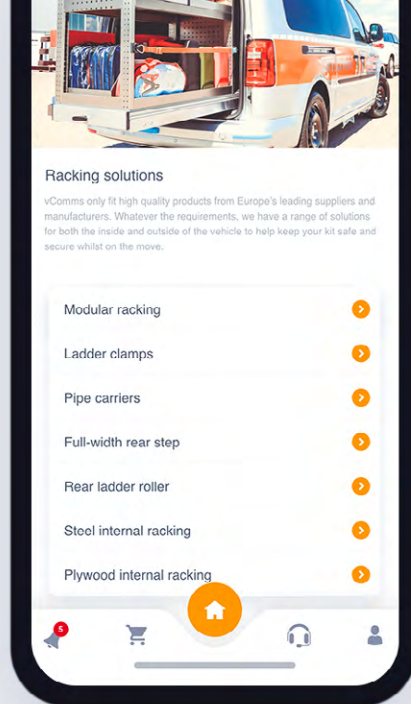

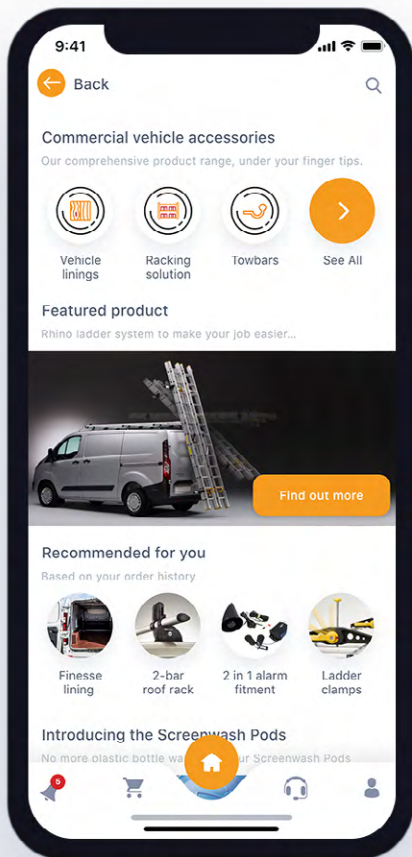

FITMENT by vLink

- One stop shop for commercial vehicle services
- Managing installers and fitters
- Live updates on projects and jobs
- Route management and planning
- Built-in image gallery

We have developed an application to manage fitments in a more efficient way through installers and fitters. The application focuses on jobs and gives us live updated throughout the process. The built-in image library helps us establish a solution to offer a consistent quality of fitments across multiple locations. The FITMENT application is used mainly for internal purposes to reduce labour and to offer an enhanced customer service for our customers.

The next phase of the application will feature a one stop commercial vehicle shop for all customers with integrated calendar, invoice database and digital signature function.

BESPOKE SOLUTION FOR EVERY CUSTOMER.

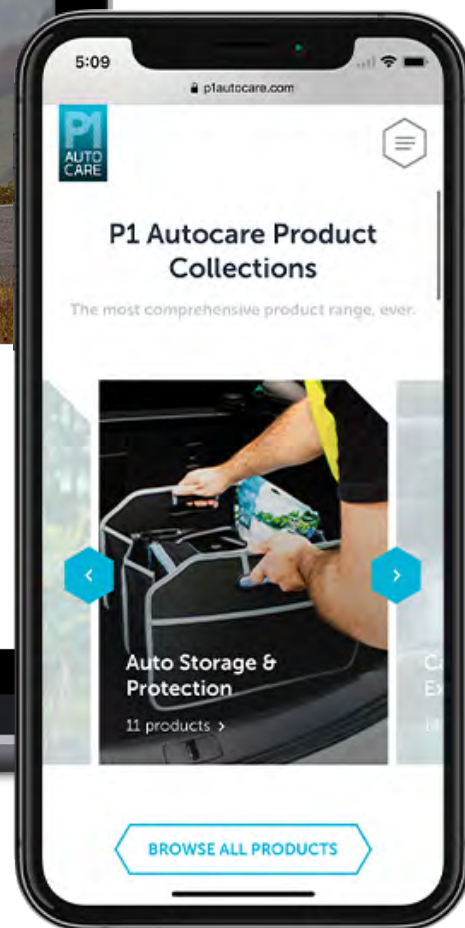

eCommerce Shops

- Developed, run and managed by the vGroup eCommerce team
- Bespoke branding
- Customer product listing
- Own customer service team
- Orders are being fulfilled by vGroup

vGroup can develop, design and deliver custom e-commerce shops for your brand and business. Filled with custom, pre-selected products we introduce a channel where your end-users and customers can order vGroup products for themselves.

Working with the industry's best, we can offer you this digital solution free of charge.

SOLVING CHALLENGES FOR PDI CENTRES AND DEALERSHIPS, NATIONWIDE.

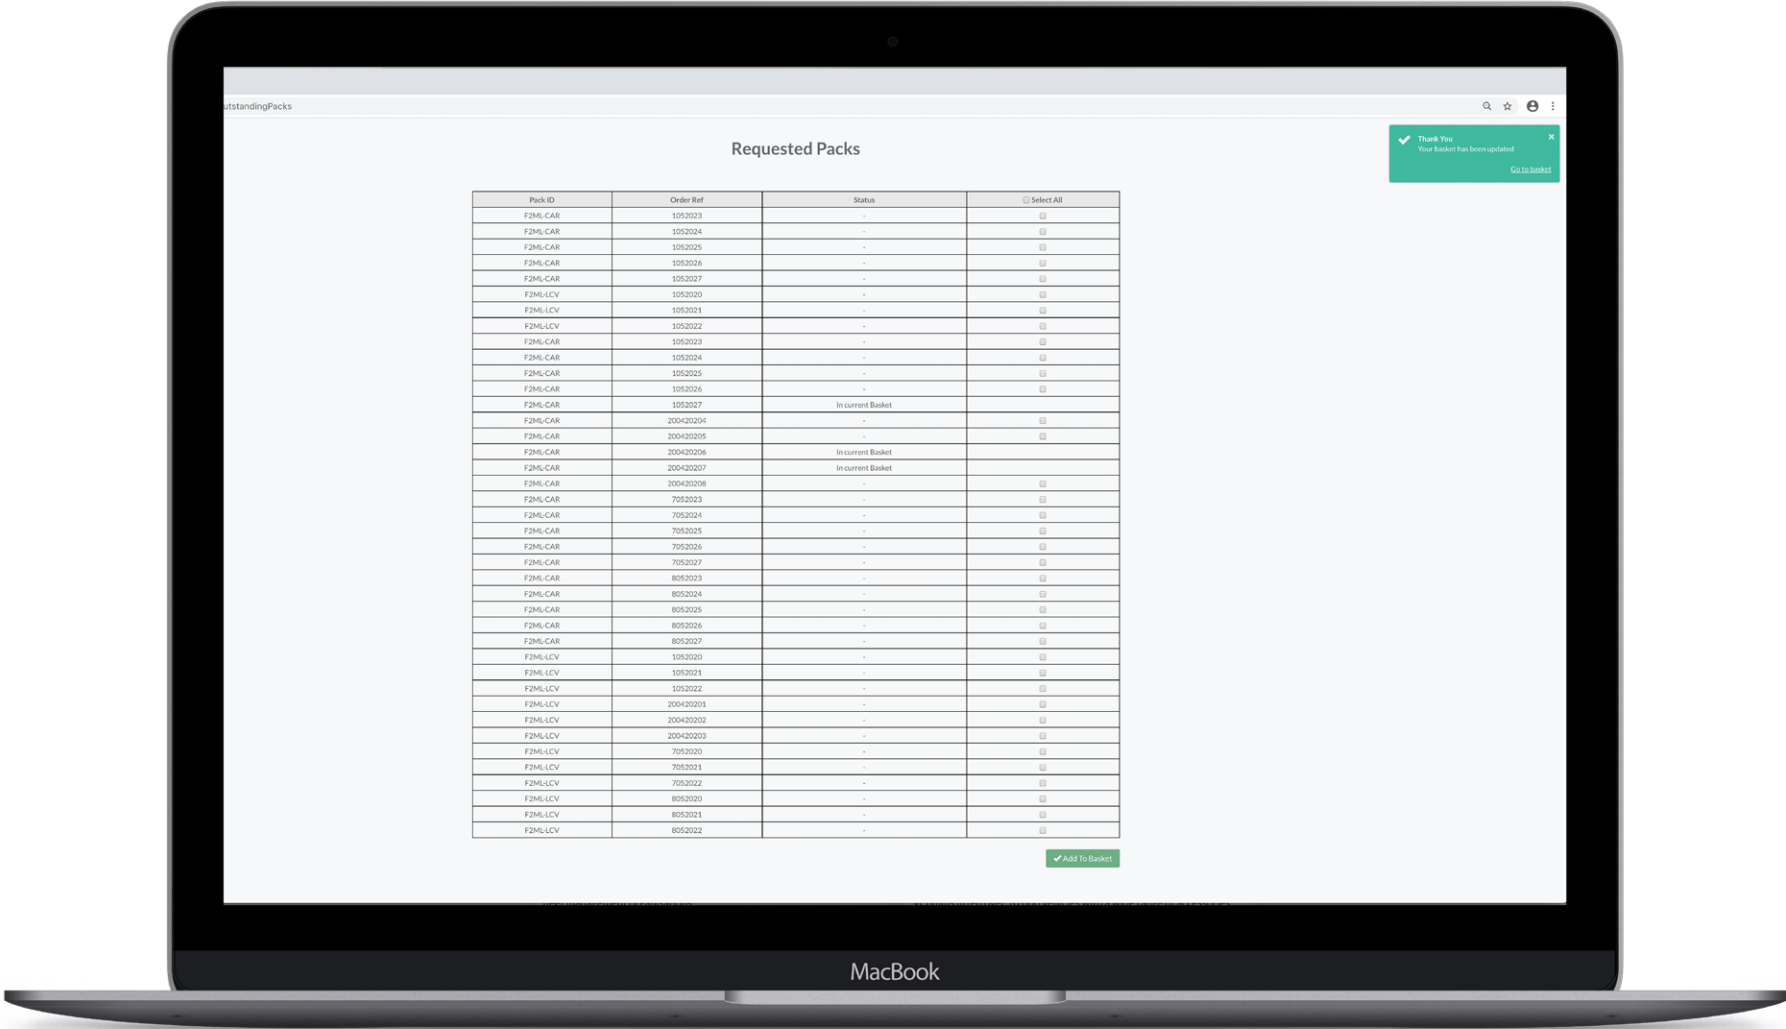

vSupply

- Tracking orders through an online portal
- Less touch points for driver packs
- Less stock to be held at site at all times
- Improvement on labour time
- Sustainable solution for PDI Centre and Dealership growth

More dealers are using PDI centres to manage the vehicles and fit the packs and PDI centres are seeing increased stock, storage and labour needs. In order to develop our partnerships, vGroup developed the 'vSupply' solution.

'vSupply' is an online portal where individual PDI centres can see what packs have been ordered to come to their sites, whilst providing a PDI log in to access the order bank and call off ordered packs in line with work schedules. vGroup can use the pending order lists to build an 'order bank' for production for better future estimations.

CONNECTING THE VEHICLE LEASING COMMUNITY.

Ebbon Dacs Integration

- More than 2,000 fleet dealers and groups rely on Leaselink
- #1 fleet eProcurement solution
- Improve efficiency
- Over 200,000 vehicles are ordered through the Leaselink
- Complete integration

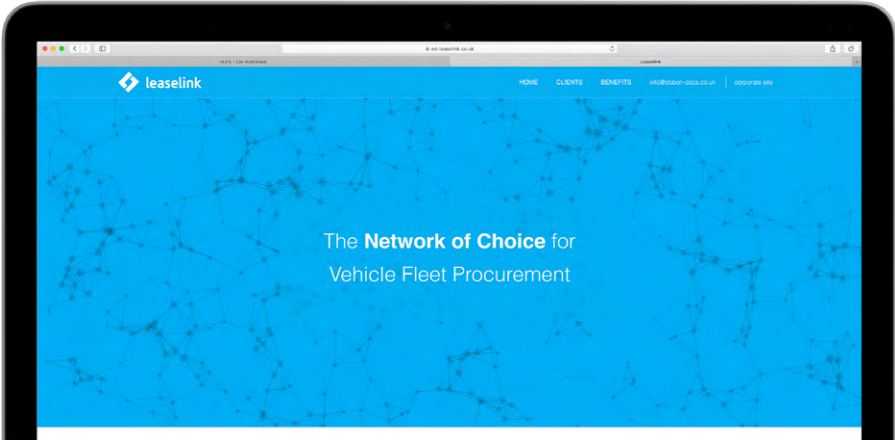

The Ebbon Dacs Integration allows for a more automatic pack selection process for leasing and dealership customers. Using this integration, the dealer is not able to proceed to delivery stage of vehicle unless a pack has been ordered, which delivers a 100% pack penetration in vehicles where a pack is requested by the leasing company. This will secure rebates for leasing companies and avoid dealer selecting incorrect pack or envelope option to ensure driver always has the correct details.

The integration reduces clicks from log in to order

completion and puts the responsibility of pack selection on the leasing company or vGroup. The integration gives access for leasing company to include the pack into the tCard in Leaselink.

When the dealer gets to the stage when the vehicle is in stock, a link will appear in Leaselink that forwards the dealer to the prepopulated pack order page. The dealer only needs to confirm a couple of elements such as make and model of the vehicle, then push into the basket. Thus reducing the overall labour to the dealer.
